DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This three story high, three bay wide building has foundation walls of marble. The foundation walls are punctuated by two casement windows protected by a metal grill. An entranceway of recessed door, transom, and mouse toothed brick lintel, plus two windows punctuate the first floor. A flight of seven marble steps leads to the entranceway. Windows are hung one over one with splayed brick lintels and marble sills surmounting a marble water table. A brick corbelled 'cornice' separates the first and second stories.

The second story is defined by six simple brick pillasters separating the three bays. The pillasters and windows surmount a marble band course acting as windowsills and pedestals. The windows have splayed brick lintels. Another marble band course lies above a stretch of decorative brick work dividing the second and third floors. The third floor is styled in the same fashion as the second story. A small molded brick cornice surmounts another stretch of decorative brick work implying a bracketed cornice with ventilation panels. The building is capped by a pediment spanning the facade. Within the pediment is more decorative brick work, semi-circular in design.
